

KABATANA GEN. N., NEW NAME FOR THE MICROSPORIDIAN GENUS KABATAIA LOM, DYKOVÁ ET TONGUTHAI, 1999

Jiří Lom¹, Iva Dyková¹ and Kamonporn Tonguthai²

¹Institute of Parasitology, Academy of Sciences of the Czech Republic, Branišovská 31, 370 05 České Budějovice, Czech Republic;

²Aquatic Animal Health Research Institute, Kasetsart University Campus, Bangkok 10900, Thailand

We have found that the name of the genus *Kabataia* Lom, Dyková et Tonguthai, 1999 which was erected for *Microsporidium arthuri* Lom, Dyková et Shaharom, 1990 in Lom et al. (Lom J., Dyková I., Tonguthai K. 1999: Dis. Aquat. Org. 38: 39-46) was preoccupied for *Kabataia ostorhinchii*, a parasitic copepod from the family Trebiidae, order

Siphonostomatoida by Kazachenko et al. (Kazachenko V.N., Korotayeva V.D., Kurochkin Yu.V. 1972: Izv. Tikhookean. Nauchno-issled. Inst. Rybn. Khoz. Okeanogr. 81: 224-238). Therefore we propose to replace it by the generic name *Kabatana* nomen novum.
