

25th ANNIVERSARY OF FOLIA PARASITOLOGICA

Twenty five years have elapsed this year since the foundation of the present journal *Folia parasitologica*. This anniversary has been an opportunity for the editors to retrospect and review hitherto activities. The journal was originally founded in 1954 as an annual "Československá parasitologie" (Czechoslovak parasitology). In this form 12 volumes were published totalling 4 170 pages, the volumes 5 and 6 in two issues each. Since 1966 the journal has been appearing as a quarterly *Folia parasitologica*. Until the end of 1978 there have been 52 issues totalling 4 992 pages. Over this period 636 authors from 34 countries have contributed to the journal. A total of 336 (Čs. parasitologie) and 765 (*Folia parasitologica*) scientific and professional papers, short communications and notes have been published and their authors are listed in the present survey which does not include biographies, book reviews, and news from scientific life. It is a first part of the survey, while the second part will constitute a subject index attached to the second issue of 1979. The first two digits represent the abbreviated year, the next numeral indicates the page number of relevant volume. Only in vol. 5 and 6, where each of the two issues were paginated from digit 1, the relevant number of issue is stated between the year and page numbers.
